

PAPER 215

Delusion Energy Frequencies, Distortion Waves, And Sound Distortion Frequencies

ON October 11, 1991 certain physical energies—as a result of planetary alignment to other planets within the system of Satania—began to cause harmonic patterns to be implemented on this planet. On a normal planet, this series of events would be good for all inhabitants. On a planet such as Urantia (that has defaulted in its dispensational revelations by higher personalities entrusted to teach the evolutionary races and the evolutionary races themselves have failed to truly find their God and Creator Father), I have decided to take the force of these energies and use it in separating the good seed from the bad seed. The implementation of my mandate is international in scope on Urantia and will affect all of the citizens on this planet. This time-space reality was foreseen by John the Revelator, and it is in this context that I am about to present the manifestation of my decision.

First, the **delusion energy frequencies**—created by human thoughts and actions that are outside of God’s plan—are sent specifically to particular individuals whose imbalances are such that they no longer are candidates for the first mansion world and have been chosen for extinction by the Ancients of Days. Crimes of murder, rape, and inhumanity to man of all kinds will increase on Urantia. Terrorism and torture will become commonplace, to the extent that it will bring dread to millions, and many will fear for their lives. Insanity will increase and so will the symptoms of secular psychological illnesses—the disunion of mental and emotional harmony—such as schizophrenia, psychopathic tendencies, sociopathic behavior, and mania.

Those who have not taken the first steps in their own consciousness as to the reception and activation of the Thought

Adjuster within and to the reception of the Spirit of Truth will become completely controlled by the delusion frequencies that they themselves have chosen to receive by cause and effect. Many innocent will suffer.

In reality, transition of the innocent by physical death is a transition for them to a higher reality and in a sense an escape from the tribulation to come upon Urantia. It is hoped that the loved ones of those afflicted innocent can begin to hear the Spirit of Truth that stands at the door of their hearts and knocks. All on Urantia must leave the institutions that further these delusions.

Distortion waves will affect every major city on the planet with a population more than 20,000. With the exception of the **protected areas**, distortion waves will cause the breakdown of equilibrium in the physical body and certain thought patterns. The physical energies of mortals will increasingly lessen, and their minds will not be able to organize thoughts.

Many will be romanced by their own distorted realities, which they will begin to further hallucinate upon as they go about their daily work schedules. This will begin to induce accidents at all levels in the work force, causing many deaths because of human mistakes. Many of these human mistakes will be blamed on the machinery.

Many in the fields of media and communication, such as authors and journalists, will begin to increasingly corrupt the minds of their readers, listeners, and viewers. They will do this because they themselves will become increasingly corrupt and distorted. Hospital surgeons and anesthesiologists will increasingly make fatal mistakes, causing the deaths of their patients.

Those in positions of responsibility, such as pilots, bus drivers, and railroad engineers will find themselves daydreaming upon their delusions, which will cause accidents that affect the lives of hundreds and even thousands.

Sound distortion frequencies are also appropriated on a mass level and will affect all population centers of more than

20,000. These frequencies will cause all animal life that have the ability to hear the sounds of these frequencies to become more aggressive. These frequencies will also cause machinery of all kinds to break down, which will increase the probability of accidents and deaths. Only those individuals who are in the perfect will of God will be protected in air flight or whatever means of transportation they choose to use. All others will be open to the effects of all accidents due to sound frequencies.

Protected areas and those within them will be safe. Those within protected areas who are not yet aligned to the eldership of the appointed, mandated personalities within them, will be protected up to a time in the near future by the grace of Christ Michael. At a certain time in the future, they will be forced to leave these protected areas. At that point, the first two energies mentioned, delusion and distortion energy frequencies, will be directed to certain individuals.

It will become increasingly clear to those who understand the effects of these energies upon individuals as to exactly what is happening. Sometimes distortion energy frequencies will be specifically assigned to those of the light, with the hope of trying to get them out of a particular geographic location where they no longer belong. They will find that it will be impossible to live without complete alignment with the purposes of Christ Michael and the administration of Machiventa Melchizedek now being appropriated on Urantia. They will be led by these distortion energies and delusion energies to the **Extension Schools of Melchizedek** [a.k.a. **Global Community Communications Schools**] in Tubac/Tumacácori, Arizona, USA.

Many of these individuals who do not understand what is happening to them will seek advice from psychiatrists, doctors, clergy, and even fortune tellers; but they will not be healed from the effects of these energies until they align themselves with the purposes of the implementation of the Machiventa Melchizedek Administration upon this planet.

This procedure I have implemented is because of the unwillingness of those in the Urantia movement to totally

accept and align themselves with **Continuing Fifth Epochal Revelation** and the implementation of my administration at the **First Planetary Sacred Home** to which many of them are asked to come. We are not interested in your degrees, in your bank accounts, or in your status positions. We are interested in your love and loyalty to Christ Michael and the Universal Father. We look upon your dogmatic views of the Fifth Epochal Revelation as childish and dangerous; dangerous to the cause of true growth and ascension. We pity your smugness and pray for the end of your obstinacy.

It is because of the consciousness in the Urantia movement that I have had to implement these delusion and distortion frequencies, with the hopes that many of you will awaken. If you cannot understand the love of God in the work and lives of those mandated personalities, some of whom you have already met, then perhaps you can better understand another side of God that you will begin to see shortly.
